Skills

Android	Kotlin	Compose	Jetpack	MVVM
Coroutines	GraphQL	Hilt	Appium	Android TV
Room	Firebase	Jenkins	Apollo	Git
Jira	Agile	KoTest	MockK	Retrofit
Clean Architecture				

Education **Mailam Engineering College** **April 2010 - April 2014**
Bachelor of Engineering in Computer Science 7.4 CPGA

Experience **RemitBee India Private Limited** **Nov 2021 - Present**
Lead Android Engineer Chennai
<https://remitbee.com>

- Led the successful migration of the entire application to Jetpack Compose, resulting in a responsive and modernized user interface, ultimately elevating the app rating from 3.8 to 4.4 stars.
- Implemented automated UI and unit test cases utilizing KoTest and MockK libraries within Jenkins, ensuring robust code quality and minimizing regressions, leading to a remarkable 99.8% crash-free application.
- Provided expert guidance and mentorship to junior team members as a Senior Developer, fostering their technical growth and professional development within the team.
- Conducted comprehensive peer reviews, enforced best practices for code quality, and collaborated with cross-functional teams to deliver new features and promptly address any arising issues.

GlobalLogic India Pvt. Ltd. **July 2020 - Nov 2021**
Senior Android Engineer Chennai

- Developed a custom Android TV launcher for a client's Android box, optimizing the user experience and meeting project requirements.
- Partnered with the QA team to automate the setup of the Android box testing environment, streamlining configurations across various hardware setups for efficient testing.
- Implemented thorough code reviews, offering actionable feedback to enhance code quality and ensure adherence to project standards.

Contagious Online Media Net. Pvt. Ltd.**Aug 2016 - Jun 2020**

Senior Android Developer

Chennai

- Analyzed, developed, tested, deployed, and enhanced code to ensure optimal performance and functionality.
- Spearheaded the development of applications for Fire TV and Android TV platforms, managed the migration from Java to Kotlin.
- Engineered a dedicated Video Player module with comprehensive playback features, including resolution control, captions, player navigation, and fast-forward functionality.
- Conducted regular code reviews, offering constructive feedback, guidance, and mentorship to junior team members to enhance their technical proficiency. This proactive approach led to improved code quality and increased team efficiency.

eVenturers Solutions Pvt. Ltd.**Jun 2014 - Aug 2016**

Android Developer

Pondicherry

- Devised documentation for each app, detailing operation aspects, functions, capabilities and features.
- Designed user interfaces that engaged multiple senses and produced immersive experiences.
- Played solo role in developing "Speed Monitoring System" using Open Street Map & "Chat System" using XMPP Server.
- Employed third-party APIs to facilitate seamless access to external, in-app cloud data.
